## **Wind Safety Training**

*Classes were well planned and executed. Training was challenging and informative with emphasis on training that is comprehensive and useful as well as required.*

## **Customized Plastics Class**

*I was speaking to one of our field technical representatives who was helping a customer take over a job - the existing tooling was moved to his shop, but our material was not making as good a part as required. Our rep used the concepts and language learned from considering molding from a machine/molder viewpoint instead of the material viewpoint. We would not have been comparing intensification ratios to determine plastic pressure before. This course did not really make our materials any better - it made our ability to help our customers' use them better.*

## **Medical Assistant**

*Whenever a patient asks me where I went to school, I proudly say Grand Rapids Community College. I want to thank you and everyone for your help. I'm proud to represent such a fine school. I hope all is going well with the current classes. Take care!*

## **Medical Assistant**

It has been a great privilege and honor to tell people (when asked) where I completed my training as a Medical Assistant. The intense subject study, and especially the in-depth class lecture and practice have been most beneficial. I cannot thank you enough for being gently, but honestly tough on us to be technically perfect and compassionate care providers.

## **Ed2Go**

*I was hesitant to take an on-line tech course like this. The instructor's style kept it interesting and informative. I will take the intermediate course soon!!*

*This course was quite helpful. I'm finally confident that I can start a database in Access and maintain it, as well as run queries and reports, add macros and do a mail merge. I will be keeping the course book I*

*made close to refer to. I plan on going to the next level by taking the Intermediate class very soon. Thank you!*
